ABOUT US

# A family business since 1994

FERMAT is the vending machine brand of Fermag, a family-owned Romanian company with more than 15 years of experience in dairy and livestock equipment. Everything we build starts with one question: how can farmers sell more of what they produce, on their own terms?

Our story began in 1994, when Margit and István Sándor founded a family business to build a better future for their son. Along the way they tried many things: second-hand clothing, car sales, a small village shop, even a bakery with its own signature bread. None of them was quite the one.

Then, in 2008, István discovered milk vending machines, and by 2011 he was designing and building his own. This was the beginning of the Fermag brand, the farmers' shop and the FERMAT vending machine family.

**1994**
Founded as a family business

**2011**
First milk vending machine of our own design

**3,000+**
Products in the Fermag range

Working side by side with dairy farmers, István soon became immersed in milking technology, and Fermag grew from milk vending into milking systems and specialised barn equipment. When his son Előd joined the business (today he is the company's CEO), the two of them delivered project after project for small and medium-sized farms, helping them stay competitive in a fast-changing market. In 2015 Fermag opened its online store, bringing its products and services to farmers across Romania.

Today Fermag offers more than 3,000 products for agricultural businesses throughout Central and Eastern Europe, from electric fencing, milking systems and livestock supplies to barn equipment and much more. We also supply electric fencing solutions to one of Romania's largest DIY retail chains, and over the past decade we have equipped many small and medium-sized farms with milking systems, premium barn equipment and automatic milk vending machines.

Assembly and service

Logistics

FERMAT

# Our journey forward

Nearly two decades of working with farmers, and countless conversations in barns, yards and markets, showed us one thing clearly: producers need simple, reliable ways to sell fresh, local food directly. That is how FERMAT was born, and it is still what the brand stands for:

**Professional vending solutions for every producer who needs them.**

FERMAT

# Our mission

We build high-quality, innovative vending machines at a fair price, so that farmers can bring fresh, local products straight to their customers. A shorter supply chain means less transport, less packaging and products that keep their original taste and quality. FERMAT gives producers a complete, easy-to-run business: they sell directly, set their own prices and keep the margin that would otherwise go to intermediaries.

FERMAT

# Why vending?

Your farm shop, open 24 hours a day, 7 days a week.

FERMAT®

# Professional vending solutions for your business

FERMAT vending machines make it easy for local producers to bring high-quality, fresh products straight to the consumer, on a shorter and more sustainable path from farm to table.

Our milk, juice, egg, cheese and bakery vending machines, together with the new modular FERMAT BOX, let producers bypass the traditional processing chain and sell to their community at better prices. And because FERMAT machines are fairly priced, the solution is within reach of farms of every size.

# Why choose FERMAT?

**01** **Direct sales**

Sell your fresh products to customers the moment they are ready, with no intermediaries and no waiting.

**02** **Sustainability**

A shorter supply chain means less transport, less packaging and a smaller carbon footprint.

**03** **Quality and freshness**

Products go straight from your farm to your customer and keep their original taste and value.

**04** **Open all year round**

Your customers can buy your products 24 hours a day, 7 days a week.

# The benefits of vending

Good for producers. Good for consumers. Good for the community.

# Benefits for producers and consumers

FERMAT vending machines create value for everyone involved. Producers sell high-quality, fresh local products at a better price than a wholesaler would pay and turn their produce into income quickly, while strengthening the local economy.

Consumers get direct access to fresh local food at a fair price, and support local farmers and sustainable practices with every purchase.

**Better price**

**Faster income**

**Fresh, local food**

**Stronger community**

# A complete business opportunity

## Sell direct. Keep the margin.

FERMAT machines are easy to operate and maintain, and come as a complete business solution. They accept coins and banknotes, and with the optional POS module also contactless and credit/debit cards, so every customer can pay the way they prefer.

They can be installed almost anywhere with a power supply: in a farmyard or a town centre, outside shops and institutions or inside shopping centres, indoors or outdoors. Your customers can buy your fresh local products at any time of day or night.

# One partner. Six ways to sell direct.

From fresh milk to warm bread, FERMAT machines are built around the products you make.

**NEW TO THE RANGE**
**FERMAT BOX**

**NEW TO THE RANGE**
**Bakery**

# Our product range

Six ways to sell your products directly. Every machine is shipped ready to install, and we support you online and by phone as you set it up.

Fresh farm milk, straight from the producer.

Natural juices from local fruit, sold with ease.

Farm-fresh eggs, available around the clock.

Local cheese and dairy, available directly.

NEW

Fresh bread and pastries, 24/7.

NEW

Modular locker vending for fresh products.

FERMAT milk VENDING MACHINE

# Milk vending machine

Fresh milk, 24/7 for you!

# FERMAT Milk vending machine for dairy farmers

More and more dairy farmers choose a milk vending machine to sell directly to the consumer and keep the value of their milk on the farm.

The FERMAT Milk vending machine is an automated, modern and robust machine for selling farm-fresh raw or pasteurised milk directly to consumers. It bypasses large-scale industrial processing and transport, and reduces the environmental impact along the way.

It can be installed almost anywhere with a power supply: in a farmyard or a town centre, outside shops or in shopping centres, indoors or outdoors. Your customers can buy your milk at any time of day or night, while you get the most out of your produce and your hard work.

We recommend it for small, medium and large farms, and for businesses that want to build their own network of milk vending points in towns and villages, in or outside shops, or directly on the farm.

The machine is made of high-quality industrial stainless steel inside and out, including the front panel.

## STANDARD EQUIPMENT

- Thermal insulation that keeps the internal temperature between 2 and 4 °C
- Refrigeration control that keeps the temperature between 2 °C and 4 °C, ensuring the safety and quality of your milk
- Fan-assisted cooling, including the milk dispensing area
- Motorised agitator with adjustable timing (geared mixing motor, as used in milk cooling tanks)
- 12/24 V milk dosing pump with non-return valve
- High-quality, highly sensitive, precisely calibrated flow meter made in Switzerland
- Built-in stainless-steel waste tank for residues
- High-quality silicone hose for milk dosing and transfer
- Digital display
- Start/Stop button
- Payment system: coin acceptor or banknote reader
- MDB interface, predisposed for the latest generation of payment systems (credit card, PayPal, etc.)
- Semi-automatic washing system for easy cleaning of the hoses, pump and flow meter

All of the above come with the **STANDARD** FERMAT Milk vending machine.

## OPTIONS

Configure your machine with the options that suit your business:

- **GSM module**: remote connectivity, reports via text message
- **POS module**: more payment methods (contactless or credit/debit card)
- **Frost protection**: keeps the inner temperature above 1 °C, ensuring the safety and quality of your milk. Recommended in colder areas
- **Round stainless-steel tank**: 50, 90, 140 or 220 litres
- **Payment system on request**: coin acceptor, banknote reader, POS module for contactless or credit/debit card payments

FERMAT®

**The FERMAT Milk vending machine is the ideal partner for selling farm-fresh raw or pasteurised milk. User-friendly and easy to maintain and clean, it delivers comfort and profit with minimal running costs.**

Built from high-quality original components in Sânsimion, Harghita County, Romania, and CE-marked.

## TECHNICAL SPECIFICATIONS

| | |
|---|---|
| **Power supply** | 230 V |
| **Weight** | 200 kg |
| **Height** | 205 cm |

FERMAT juice VENDING MACHINE

# Juice vending machine

Fresh juice, 24/7 for you!

# FERMAT Juice vending machine

Sell fresh, 100% natural juice at the push of a button. More and more farmers and producers choose vending machines to sell directly to the consumer, and everybody loves fresh, natural juice.

The FERMAT Juice vending machine is an automated, modern and robust machine for selling fresh, 100% natural juice directly to consumers. It bypasses large-scale industrial processing and transport and reduces the environmental impact.

It can be installed almost anywhere with a power supply: on farms, in town centres, outside shops, in kindergartens, schools, hospitals and other institutions, indoors or outdoors. Your customers can buy your juice at any time of day or night.

The machine is made of high-quality industrial stainless steel inside and out, including the front panel. It dispenses three different products and holds up to 200 litres on nine shelves designed for bag-in-box juice.

## STANDARD EQUIPMENT

- Thermal insulation that keeps the internal temperature between 2 and 18 °C
- Refrigeration control that keeps the temperature between 2 °C and 18 °C, ensuring the safety and quality of your juice
- Fan-assisted cooling, including the dispensing area
- 3 × 12/24 V dosing pump with non-return valve
- 3 × high-quality, highly sensitive, precisely calibrated flow meter made in Switzerland
- High-quality silicone hose for juice dosing and transfer
- Bag-in-box valves
- Digital display
- 3 buttons for different drinks
- Start/Stop button
- Payment system: coin acceptor or banknote reader
- MDB interface, predisposed for the latest generation of payment systems (credit card, PayPal, etc.)
- Semi-automatic washing system for easy cleaning of the hoses, pump and flow meter

All of the above come with the **STANDARD** FERMAT Juice vending machine.

## OPTIONS

Configure your machine with the options that suit your business:

- **GSM module**: remote connectivity, reports via text message
- **POS module**: more payment methods (contactless or credit/debit card)
- **Frost protection**: keeps the inner temperature above 1 °C, ensuring the safety and quality of your juice. Recommended in colder areas
- **Payment system on request**: coin acceptor, banknote reader, POS module for contactless or credit/debit card payments

FERMAT®

**The FERMAT Juice vending machine is the ideal partner for selling fresh, 100% natural juice. User-friendly and easy to maintain and clean, it delivers comfort and profit with minimal running costs.**

Built from high-quality original components in Sânsimion, Harghita County, Romania, and CE-marked.

FERMAT egg VENDING MACHINE

# Egg vending machine

Fresh eggs, 24/7 for you!

# FERMAT Egg vending machine

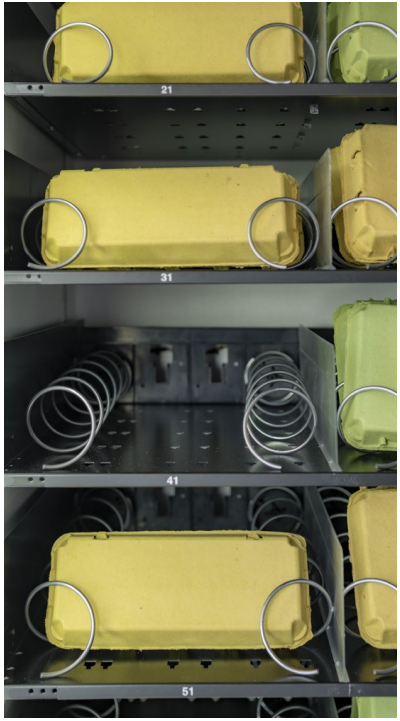

The FERMAT Egg vending machine is the ideal choice for poultry farmers who want to offer their fresh eggs directly to the local community. Designed for quality and convenience, it keeps eggs safe and ready, so customers can buy farm-fresh eggs whenever it suits them.

Producers gain a steady source of income, while consumers enjoy accessible, high-quality eggs at a fair price.

Built for reliability and simple maintenance, the FERMAT Egg vending machine helps farmers reach more people and build stronger relationships with local customers, bringing freshness straight from farm to table.

With its large, full-view tempered-glass window, it is the perfect way to deliver farm-fresh eggs to customers at the touch of a button.

## STANDARD EQUIPMENT

- Compact, easily removable cooling unit with eco-friendly R290 refrigerant. Internal temperature 3 °C at an external temperature of 32 °C
- Power supply: 230 V ±10% (110 V version available), average annual consumption 2,270 kWh
- Product lift for delicate items that should not drop
- 10.1" graphic display, 1024 × 600 pixels, capacitive touch. Multilingual and able to show promotional content
- Telemetry: EVA-DTS (optional), Ethernet and Wi-Fi connectivity, 4G router can be added. Software updates locally and remotely
- Tempered-glass front for excellent product visibility
- Payment system: coin acceptor or banknote reader
- MDB interface, predisposed for the latest generation of payment systems (credit card, PayPal, etc.)
- Steel spirals
- LED lighting with adjustable colour temperature

All of the above come with the **STANDARD** FERMAT Egg vending machine.

## OPTIONS

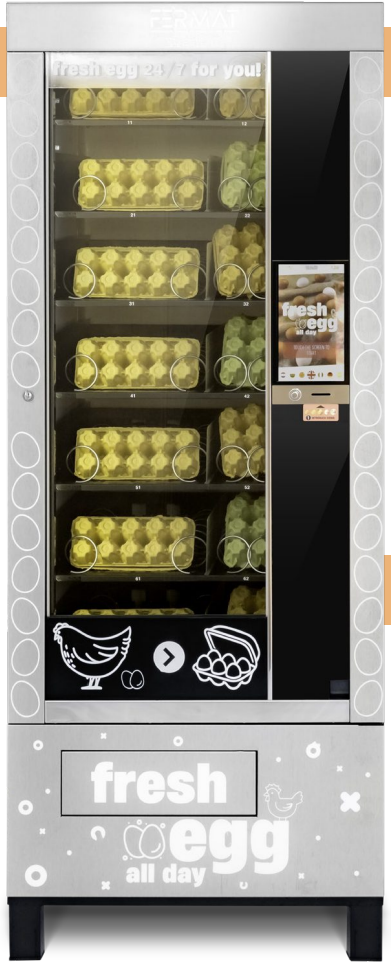

Configure your machine with the options that suit your business:

- **GSM module**: remote connectivity, reports via text message
- **POS module**: more payment methods (contactless or credit/debit card)
- **Optional quiet chiller**
- **Optical sensor**: checks that the product has actually dropped and, if not, offers programmable options
- **Reinforced door**: anti-vandal design for high-risk locations
- **Payment system on request**: coin acceptor, banknote reader, POS module for contactless or credit/debit card payments

FERMAT®

**The FERMAT Egg vending machine is the ideal partner for poultry farmers who want an easy way to sell farm-fresh eggs directly. User-friendly and easy to maintain and clean, it delivers comfort and profit with minimal running costs.**

VENDING MACHINE

# Cheese vending machine

Fresh cheese, 24/7 for you!

# FERMAT Cheese vending machine

The FERMAT Cheese vending machine is an excellent choice for local cheese makers who want to bring their high-quality products directly to consumers. Its well-thought-out design keeps cheese fresh, easy to reach and ready to buy at a single touch.

Producers gain a steady revenue stream and the opportunity to offer their community fresh dairy products at a fair price. Reliable, easy to maintain and built to last, the machine is a smart investment for producers who want to grow their brand and earn customer trust with farm-to-table convenience.

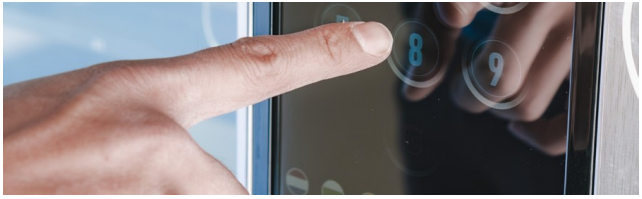

With its large, full-view tempered-glass window, it is the perfect solution for selling farm-fresh cheese and other dairy products at the touch of a button.

Fresh bread, 24/7 for you!

# FERMAT Bakery vending machine

Fresh bread, crusty rolls and pastries, available whenever your customers want them. The FERMAT Bakery vending machine is our largest spiral vending machine, ideal for bakeries, farm shops and producers who want to sell fresh baked goods and packaged products around the clock.

Behind the full-height tempered-glass door, seven trays with five selections each present your products at their best under LED lighting. Customers choose on the touchscreen in their own language, pay by coin or banknote (or by card with the optional POS module) and collect their purchase from the delivery compartment.

The stainless-steel cabinet is built for everyday use in busy places: markets, residential areas, petrol stations, campuses and company sites. Refrigeration can be switched on or off as needed, ambient for bread and pastries, chilled for sandwiches, dairy and other fresh products.

For operators, a product database with images, promotional media, a shopping-cart function with multi-buy discounts and detailed sales and cash reports make day-to-day management simple.

**35**

NEW

FERMAT box VENDING MACHINE

# Smart locker vending

Fresh products, 24/7, in your own FERMAT BOX.

Visualisation for illustrative purposes. The final product may differ in detail.

# Smart modular locker vending

FERMAT BOX brings the convenience of a parcel locker to fresh-food retail. Developed and built together with our partner ROTTE, this modular vending machine offers individually locked compartments for bread, pastries, vegetables, packaged products or any other goods, open 24/7.

Shopping takes seconds: the customer chooses a product on the 15" touchscreen, pays by coin or banknote (or by card or phone with an optional POS module), and the matching compartment opens automatically.

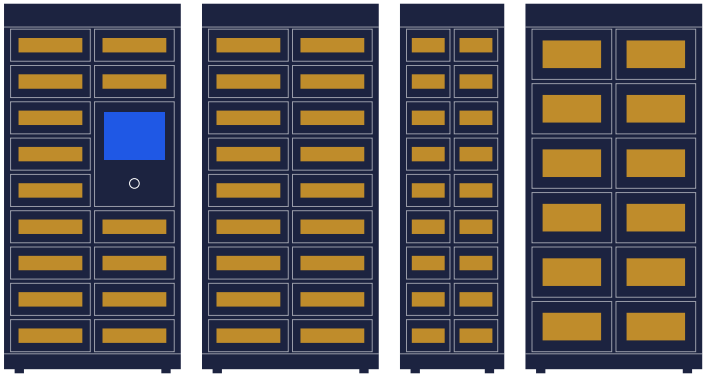

For the operator, a web-based management platform shows the status of every compartment and handles bulk loading, withdrawals, stock records, an audit log and sales reports, from anywhere.

Because FERMAT BOX is modular, it grows with your business: start with the main module and add medium, small or large compartment modules, now or later, to match your product range and location.

FERMAT BOX

FERMAT SERVICE

# From order to operation

One partner from the first conversation to the first sale, and long after.

## 01

### Assessment

We talk about your products, your location and your goals, and recommend the machine that fits.

## 02

### Configuration

Choose the machine, the payment systems and the options that suit your business.

## 03

### Delivery & set-up

Your machine ships from Fermag's headquarters ready to install. Setting it up on site is simple, and our step-by-step guidance helps you all the way.

## 04

### Training

We show you online or by phone how to fill, clean and run the machine day to day.

## 05

### Service & support

Our service team is happy to answer every question. Technical support is available online and by phone, and original spare parts ship from our warehouse.

# What our customers say

★★★★★

"We have been using FERMAT vending machines for 10 years and currently operate nine of them. Technically they work very well; the few minor issues over the past decade were easily resolved. On average we sell 70 litres of milk per day per machine, which is a tremendous help for our farm. Starting this business was a great decision. Thank you for the excellent cooperation."

**Florin Nedelcu**
Craiova · dairy farmer

★★★★★

"We thought long and hard about whether it would be worth it. In the end we decided to give it a try, and what a great decision it was! The machine makes selling milk easier and more profitable. Setting it up was easy, and daily use and cleaning are simple too. We have a daily income and can plan ahead. I can only recommend the FERMAT vending machine."

**Costel Tudorache**
Satu Mare · dairy farmer

★★★★★

"I am completely satisfied with the vending machine because it truly makes selling milk easier and more economical. We have a daily income, which is especially important for our farm and family. Cleaning and maintenance are no problem: with a little attention and a daily routine, it is always clean and ready to use."

**Judit András**
Târgu Secuiesc · dairy farmer

★★★★★

"I am very satisfied with the milk vending machine! It works perfectly all the time, and it is a huge relief to be able to sell milk directly to local customers, which is much more profitable than selling to the dairy plant. For the farm, this means a steady income that helps us operate securely. Maintenance and cleaning are simple: just follow the prescribed steps and everything runs smoothly."

**Dezső Czikó**
Remetea · dairy farmer

★★★★★

"Buying these milk vending machines has been a huge advantage. We own four, and each one operates perfectly. Locals really enjoy buying fresh milk straight from our machines, which is far more profitable than selling to wholesalers, and we receive our income daily, which keeps our business stable. The few minor technical issues we had were resolved promptly and professionally. I wholeheartedly recommend FERMAT milk vending machines."

**László Olti**
Siculeni · dairy farmer

PARTNER PROGRAMME

# Grow with FERMAT

We are looking for dealers and distributors who want to bring fresh, local food closer to people in their own market.

# Why partner with FERMAT?

## 01

### Proven products

Vending machines designed and built by a family company that has worked with farmers since 2008.

## 02

### One complete range

Milk, juice, egg, cheese, bakery and locker vending: six solutions from one partner.

## 03

### Technical support

Remote technical support online and by phone: training for your sales and service team, help with set-up and troubleshooting, and a direct line to our engineers.

## 04

### Spare parts

Original spare parts and consumables shipped from our warehouse in Sânsimion.

## 05

### Marketing support

Catalogues, visuals and product information for your local market.

## 06

### Your market

Partnership terms agreed individually for your territory and business model.

# How to become a partner

**01** **Get in touch**

Tell us about your company, your market and your customers.

**02** **Meet the machines**

Visit us at the Fermag headquarters in Sânsimion or meet us at a trade fair and see the machines in action.

**03** **Agree on terms**

We put together a partner agreement that fits your territory.

**04** **Start selling**

Training and launch support help you get off to a strong start.

# Thank you

Thank you for exploring the FERMAT vending machine range. We believe in bringing fresh, local dairy and farm products directly to the consumer, with quality, convenience and value built into every machine. From milk, cheese and eggs to fresh juice and bread, our vending solutions are made with care to support farmers and strengthen communities.

Choose FERMAT to connect with your customers on a new level: give them the wholesome products they are looking for, while your business and the environment benefit too. Let's make fresh, quality food more accessible and strengthen the bond between farm and table. Join us on the way to a more sustainable, community-focused future.
